

# List of Boxes

---

## Chapter 1

Bardet-Biedl Syndrome and the Neuronal Primary Cilium  
*Scott T. Brady*

## Chapter 2

Spectrin and Lipid Raft Membrane Components Participate in the Pathology of Brain Injury  
*George J. Siegel*

## Chapter 3

Therapy of Brain Edema: Potential Pharmacologic Regulation of Aquaporin 4  
*George J. Siegel*

## Chapter 4

Ion Channelopathies  
*Bertil Hille and William A. Caterall*

## Chapter 5

Cardiolipin and Energy Metabolism in Normal Brain, Neurodegeneration and Gliomas  
*Thomas N. Seyfried*

## Chapter 6

Tubulin Mutations and Neurological Diseases  
*Yuyu Song and Scott T. Brady*

## Chapter 7

Mutant Dynamin 2 and Neuromuscular Disorders  
*Gustavo Pigino, Gerardo Morfini and Scott T. Brady*

## Chapter 8

Axonal Transport Deficits and Pathogenic Mechanisms in Hereditary Spastic Paraplegias  
*Matthew Burns and Gerardo Morfini*

## Chapter 9

Integrins as Therapeutic Targets in Autoimmune Disease  
*Babette Fuss*

## Chapter 10

Examination of Pathologic Changes in White Matter by Diffusion Tensor Imaging  
*Joyce A. Benjamins*

## Chapter 11

A Mutation in the *SLC25A12* Gene Reveals Its Critical Roles in N-acetylaspartate Formation, Myelination and Brain Function  
*Mary A. McKenna, Gerald A. Dienel, Ursula Sonnewald, Helle S. Waagepetersen and Arne Schousboe*

## Chapter 12

Glycinergic Neurotransmission and Neurologic Disease  
*George J. Siegel*

## Chapter 13

Inhibition of AChE: A Terrorist Target and a Potential Contributor to Gulf War Syndrome  
*Susan Wonnacott*

## Chapter 14

Neuronal-specific Missplicing in Familial Dysautonomia  
*George J. Siegel*

## Chapter 15

5-HT<sub>1A</sub> Receptor Polymorphisms and Mental Illness  
*Julie G. Hensler*

## Chapter 16

Daytime Sleepiness and Narcolepsy  
*Rob Leurs, Lindsay Hough, Patrizio Blandina, Helmut Haas*

## Chapter 17

Neuronal Autoimmune Encephalitis  
*George J. Siegel*

## Chapter 18

Receptor Endocytosis in Treatment of Refractory Status Epilepticus  
*George J. Siegel*

## Chapter 19

Inherited Diseases of Purine Metabolism  
*George J. Siegel*

## Chapter 20

Neuropeptide Y  
*Richard E. Mains and Betty A. Eipper*

## Chapter 21

Small G Proteins and Neurologic Disease  
*George J. Siegel*

## Chapter 22

The Mechanisms of Antidepressant Action  
*Christopher Pittenger*

## Chapter 23

Charcot-Marie-Tooth Disease  
*Anne M. Heacock*

## Chapter 24

Ischemia and Toxicity: When Ca<sup>2+</sup> Signaling is Too Much of a Good Thing  
*Jonathan Art*

## Chapter 25

Cognitive Enhancement Strategies  
*Florian Plattner and James A. Bibb*

**Chapter 26**

Pleiotropic Effects of Trk Receptor Mutations

*Scott T. Brady***Chapter 27**

Transcriptional Dysregulation in Huntington's Disease

*Terri Schochet, James Eberwine and Ditte Lovatt***Chapter 28**

Tuberous Sclerosis

*Alison K. Hall***Chapter 29**

NGF and Pain

*Wilma Friedman***Chapter 30**

Stem Cell Therapies for Dysmyelinating Diseases

*Alison K. Hall***Chapter 31**

Periventricular Leukomalacia

*Wendy B. Macklin***Chapter 32**

Enhancement of Fiber Growth and Regeneration in the Injured Spinal Cord: Antibody-Mediated Neutralization of the Neurite Growth-Inhibitory Myelin Protein Nogo-A as a Novel Therapy for CNS Injuries

*Martin E. Schwab***Chapter 33**

One Pathogen but Three Immune Responses with Three Neurologic Outcomes

*Monica J. Carson***Chapter 34**

Microglial Cells Are Major Sensors for CNS Homeostasis Disruption: Significance for the Stroke Penumbra and Neurodegenerative Diseases

*Nicolas Bazan, Aram Asatryan and Ludmila Belayev***Chapter 35**

The Stroke Penumbra is a Translational Target

*Tiffany N. Eady, Ludmila Belayev and Nicolas G. Bazan***Chapter 36**

Mediator Lipidomics in Translational Neurosciences

*David T. Stark and Nicolas G. Bazan***Chapter 37**

Last Stop, Cell Death: Caspases and Synaptic Plasticity

*Scott T. Brady***Chapter 38**

Molecular Motors and Peripheral Neuropathies

*Scott T. Brady***Chapter 39**

Aquaporin 4 and Neuroinflammation

*Susan M. Staugaitis and Bruce D. Trapp***Chapter 40**

Targets of Research into Preventing Epileptogenesis

*Daniel L. Jones and James O. McNamara***Chapter 41**

Epigenetic Modifications and Neurologic Disease

*George J. Siegel***Chapter 42**

Cognition in Urea Cycle Defects: Role of Ammonia, Glutamine and Myoinositol

*Marc Yudkoff***Chapter 43**

All Roads Lead to Rome: The Relevance of Lipid Rafts in the Pathogenesis of Metabolopathies

*Ernesto R. Bongarzone***Chapter 44**

MuSK as the Master Organizer of Neuromuscular Junction Development

*Scott T. Brady***Chapter 45**

Superoxide Dismutase Type 1 and Redox Signaling

*Scott T. Brady***Chapter 46** $\gamma$ -Secretase and Presenilins: Not Just for A $\beta$  and Alzheimer's Anymore*Scott T. Brady***Chapter 47**

Tau Protein as a Scaffold for Signaling Molecules

*Scott T. Brady***Chapter 48**

Inhibition of Transglutaminase as a Potential Therapy in Polyglutamine Diseases

*George J. Siegel***Chapter 49**

Clinical Symptoms in Parkinson's and Huntington's Disease Reflect Loss of Connectivity Rather than Loss of Neurons

*Scott T. Brady***Chapter 50**The Seeding and Transmissibility of Tau, A $\beta$  and Synuclein Aggregates*Scott T. Brady***Chapter 51**

Molecule-Directed Therapies for Retinal Disease

*Theodore G. Wensel***Chapter 52**

Olfaction and Social Communication

*Steven D. Munger*

**Chapter 53**

Deafness Genes

*Jocelyn F. Krey and Peter G. Gillespie***Chapter 54**

Pain: The Clinical Challenge

*Perrine Inquimbert and Joachim Scholz***Chapter 55**

Gender Differences in Response to Chronic Stress

*Scott T. Brady and Hanwu Liu*

How Do We Know? Sleep, Circadian Disruption and Stress

*Ilia N. Karatsoreos and Bruce S. McEwen***Chapter 56**

Targeting NR2B for Memory Improvement

*Joe Z. Tsien***Chapter 57**

Insomnia

*Helen A. Baghdoyan and Ralph Lydic***Chapter 58**

It's complicated: The Genetics of Schizophrenia and Related Serious Mental Illnesses

*Joseph T. Coyle***Chapter 59**

Fragile X Syndrome and Autism Spectrum Disorder

*Joseph T. Coyle***Chapter 60**

Inflammation, Cytokines and Glutamate: A New Pathway to Depression

*Joseph T. Coyle***Chapter 61**

A Novel, Unexpected Treatment for Alcoholism

*Charles P. O'Brien*
